

Laporan Praktikum

Bahasa Pemrograman 1

Dosen pengampu : (*Dede Husen, M.Kom.*)

Modul 7 & 8

Nama : Muhammad Rizal Nurfirdaus

NIM : 20230810088

Kelas : TINFC – 2023 – 04

Teknik Informatika
Fakultas Ilmu Komputer
Universitas Kuningan

Modul 7

PreTest

1. Tulis dan jelaskan dengan singkat komponen dari JDBC API!
JDBC API terdiri dari beberapa komponen utama untuk mengelola koneksi dan operasi database. DriverManager mengelola driver database dan membuat Connection untuk menghubungkan aplikasi ke database. Statement digunakan untuk menjalankan perintah SQL statis, sedangkan PreparedStatement memungkinkan eksekusi query dengan parameter, lebih aman terhadap SQL Injection. Hasil query disimpan dalam ResultSet, yang memungkinkan pembacaan data baris demi baris. SQLException menangkap kesalahan yang terjadi selama operasi database. Alternatifnya, DataSource menyediakan manajemen koneksi dengan pooling untuk aplikasi skala besar, membuat proses lebih efisien. Komponen-komponen ini saling terhubung untuk memudahkan pengelolaan data di aplikasi Java.

PostTest

1. lengkapi program, jika tombol simpan di klik akan menampilkan YesNoQuestion untuk penyimpanan data
2. jika tombol simpan di klik, Form Input Data akan kembali kosong seperti kondisi awal
3. jika tombol simpan diklik, data yang di input akan langsung tampil pada JTable.

Modul 8

PreTest

1. Tuliskan sql query untuk input, simpan, update, dan delete!

```
CREATE TABLE mahasiswa (  
    id INT AUTO_INCREMENT PRIMARY KEY,  
    nama VARCHAR(100),  
    umur INT,  
    nilai VARCHAR(10)  
);
```

```
INSERT INTO students (name, umur, nilai)  
VALUES ('Rizal', 19, 'A');
```

```
SELECT * FROM mahasiswa;
```

```
UPDATE mahasiswa  
SET nilai = 'B'  
WHERE id = 1;
```

```
DELETE FROM mahasiswa  
WHERE id = 1;
```

PostTest

1. Lengkapi program, jika tombol Edit di klik akan menampilkan message dialog YesNoQuestion untuk edit data
2. Lengkapi program, jika tombol Hapus di klik akan menampilkan message dialog YesNoQuestion untuk hapus data
3. Lengkapi program, jika tombol Edit/Hapus di klik Form Input Data akan Kembali kosong seperti kondisi awal

4. Setelah Edit/Hapus, maka jTable akan melakukan Load Data

Analisis : Program ini mengelola data mahasiswa dengan fitur CRUD (Create, Read, Update, Delete) yang dilengkapi konfirmasi dialog untuk aksi Edit dan Hapus. Setiap perubahan data disertai validasi dan interaksi pengguna melalui dialog Yes/No Question untuk memastikan tindakan. Setelah operasi Edit atau Hapus berhasil, form input dikosongkan ke kondisi awal menggunakan metode `reset_form()`, dan tabel diperbarui secara otomatis dengan memanggil `load_data()`. Implementasi ini memastikan integritas data, kemudahan pemakaian, dan responsif terhadap tindakan pengguna dalam pengelolaan data mahasiswa.

Tugas

1. Buat Form Data Mata Kuliah dan Data Nilai (Tugas,
2. Buat table baru (mk dan nilai) di database yang sudah dibuat pada modul 6
3. Lengkapi CRUD pada masing-masing Form (no.1)

Analisis : Kode diatas bertujuan untuk menyimpan, mengedit, dan menghapus data mata kuliah dan nilai pada tabel telah berhasil disesuaikan dengan kebutuhan. Fungsi penyimpanan memastikan data dimasukkan ke tabel dengan format yang benar, termasuk validasi input untuk mencegah data kosong. Fungsi pengeditan memodifikasi data berdasarkan mata kuliah yang dipilih, dan fungsi penghapusan memastikan data yang spesifik dihapus dari tabel. Semua interaksi dengan database menggunakan perintah SQL yang sesuai, sementara tabel di GUI diperbarui secara dinamis untuk mencerminkan perubahan data. Solusi ini sudah mencakup validasi dan integrasi yang baik antara antarmuka pengguna dan database, sehingga dapat digunakan dengan lancar untuk pengelolaan data mata kuliah dan nilai.

4. Buat Form Data Nilai Mahasiswa, yang menampilkan NIM, NAMA, JK, PRODI, KELAS, NILAI, PHOTO

Analisis : Aplikasi ini merupakan program pengelolaan data mahasiswa berbasis GUI (Graphical User Interface) yang dibuat menggunakan Java Swing. Tampilannya memiliki dua panel utama: formulir input data di sebelah

kiri dan tabel untuk menampilkan data mahasiswa di sebelah kanan. Formulir input berisi beberapa field, seperti NIM, NAMA, JENIS KELAMIN, PRODI, KELAS, NILAI, dan PHOTO, dengan tambahan fungsi untuk memilih file foto melalui tombol **ButtonPilihFoto**. Di bagian bawah formulir terdapat tiga tombol utama: **SIMPAN**, **EDIT**, dan **HAPUS**, yang berfungsi untuk mengelola data pada tabel. Pada tabel, terdapat kolom NIM, NAMA, JENIS KELAMIN, PRODI, KELAS, NILAI, dan PHOTO yang berisi data mahasiswa yang sudah diinput. Aplikasi ini mempermudah manajemen data mahasiswa dengan fitur input, edit, dan hapus yang terintegrasi dalam antarmuka sederhana.
